Product specification

OPTAPAD® EXTENDED is a new ergonomic mouse which gives you a strain free posture. The centered touchpad and the wide and soft wrist rests allow you to have a natural working position and relieves tension and strains in your arms, neck and shoulders. The new and wide wrist rests give you support along the whole keyboard and can be removed and replaced. The wrist rests can be washed with water, detergents or hand sanitizer for best result. They are easily but firmly attached to the bottom with magnets. The Optapad glass touchpad uses functions and gestures commonly used on smartphones and tablets. The friction free movement on the touchpad and the optical technology enables a unique pinpoint precision. This is the slimmest and newest centered steering device on the market, offering you the possibility to customize functions and settings.
