## Powerdot 1

**x1** 

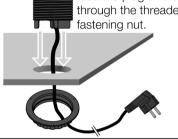

**x1** 

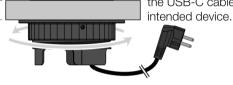

INSERT Insert grommet into the hole, then feed the plug all the through the threaded fastening nut.

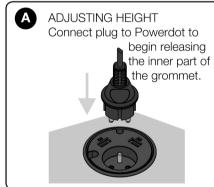

TURN CLOCKWISE & PLUG IN

Turn the fastening nut as far up the thread as possible. Make sure that it has been thoroughly tightened. Plug the French plug into a wall socket or powerstrip of your choice. Lastly, connect the

Note! The fastening nut has 3 holes for fixing with wood screws.

RELEASE INNER PART
Rotate plug counter-clockwise
to release the innert part.

ADJUSTING HEIGHT

30 mm maximum

The inner part should now be loose. Adjust to desired level - see box: ADJUST LEVELS

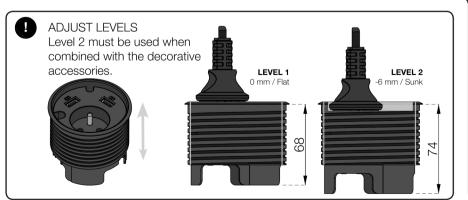

**Note!** Pay attention to the locking geometry as it will help with adjusting the inner part to the desired level.

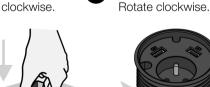

2 **feed-throughs** (Ø7, Ø9.5 mm)

LOCKING POSITION
Rotate clockwise.
